

Belal Salah

📍 Maadi, Cairo ✉ belal.salah259@gmail.com ☎ 01080121345 📁 Portfolio in LinkedIn 🐙 GitHub

Summary

Junior Full Stack Engineer with experience building applications using Laravel, Vue, and Angular. Experienced in state management, API integration, unit and integration testing, performance optimization, and developing responsive maintainable UIs, along with building RESTful APIs, authentication systems, and backend business logic.

Technical Skills

Frontend: HTML5, CSS3, Sass, Bootstrap, Tailwind CSS, PrimeNG, JavaScript, TypeScript, Angular, Vue.

Backend: Laravel, MySQL, NoSQL databases, RESTful APIs, and system design fundamentals.

State & Testing: Angular Signals, RxJS, NgRx, Pinia, Jasmine, Karma.

Tools: Git, GitHub, Figma, Lighthouse, WebPageTest, Sentry.

AI & Agents: Claude API, AI Agents, Skills & Workflows, Prompt Engineering.

Concepts: OOP, SOLID Principles, DSA, Algorithms, Design Patterns, RESTful APIs, SQL Basics, Rendering Techniques, Performance Optimization.

Experience

Data Entry & Research (Part-time)

Maadi, Cairo

ConvertedIn

Feb 2024 – Aug 2025

- Responsible for adding product data to the company's websites using Shopify.
- Worked on tasks involving researching companies with specific technologies and creating organized Excel sheets with detailed information.

Full Stack Engineer

Maadi, Cairo

ConvertedIn

Aug 2025 – May 2026

- Built and maintained full-stack features using Vue.js, Angular, and Laravel across multiple production projects.
- Worked on the ConvertedIn Orders system, contributing to order workflows, API integrations, and business logic implementation.
- Improved application performance by optimizing rendering, reducing unnecessary API calls, and enhancing frontend architecture.
- Developed reusable and responsive UI components to maintain consistency and improve user experience.
- Designed and consumed RESTful APIs using Laravel, implementing validation, middleware handling, and optimized database queries.
- Improved backend performance through query optimization, pagination, and efficient Eloquent relationship handling.

Education

Misr University for Science and Technology

Sept 2023 – Present

Faculty of Computer Science

- **Degree:** Very Good
- **Coursework:** Computer Architecture, Data Structures, Algorithms, Object-Oriented Programming, SQL.

Projects

E-commerce Application

Backend Repo [↗](#) **Frontend Repo** [↗](#)

- Built with Angular and Bootstrap using a modular, lazy-loaded architecture.
- Implemented Reactive Forms and Template-driven Forms for login, register, and checkout.
- Used services, guards, pipes, and environment-based configurations for clean structure and scalability.
- Applied OnPush Change Detection, hydration, and performance optimizations (CLS via aspect-ratio, WebP images, resource hints like preload, prefetch, dns-prefetch).
- Fully responsive UI designed with Bootstrap 5.
- Developed secure JWT-based authentication with role-based access control (admin/manager/user) and password hashing using crypto-js.
- Built full RESTful CRUD operations for categories, products, users, and orders using a modular controller-service architecture.
- Implemented custom reusable middleware for token verification, role protection, async error handling, and centralized error management.

Market-Place

GitHub Repo [↗](#)

- Built a full-featured multi-role marketplace application using Laravel, Vue 3, Inertia.js, and Tailwind CSS.
- Implemented role-based system with Admin, Vendor, and Customer dashboards with secure access control.
- Developed core e-commerce features including products, categories, orders, payments, and reviews management.
- Built vendor tools such as earnings dashboard, coupons system, order tracking, and messaging system.
- Designed customer flow including product browsing, search, ordering, and review system.
- Integrated modern UI enhancements including GSAP animations, dark mode, and responsive design.
- Focused on scalable architecture, clean code structure, and database-driven backend using MySQL.

Movie App

Live Demo [↗](#) **Frontend Repo** [↗](#)

- Built a responsive movie browsing web application using Angular, TypeScript, and TMDB API integration.
- Implemented core features including movie listing, filtering by category/genre, search, and detailed movie/actor views.
- Developed rich UI features such as cast carousel, trailers modal, theme switching, and responsive design across devices.
- Focused on performance optimization, reusable components architecture, and clean scalable project structure.
